Skills

Frontend & Mobile

React.js, Next.js, Vue.js, Angular.js,
TypeScript · Flutter, React Native

Backend

Node.js (NestJS, Express), Python (Django,
DRF)

Database

PostgreSQL, MySQL, MongoDB, Redis ·
Prisma, TypeORM

API & Auth

REST API, JWT, RBAC, WebSocket,
Swagger/OpenAPI

AI / LLM

RAG, Vector DB (Qdrant), Ollama,
OpenRouter, OpenAI · Cursor, Claude
Code, n8n

Infra & DevOps

Docker, Kubernetes (self-hosted), Git, CI/
CD · VPS, Vercel, Cloudflare

Education

Full Stack Development

Self-Taught & Online Courses, 2024–
Present

High School Diploma

Kyaikkhami, 2019–2024

Certifications

- Python & Django Full-Stack —
DynamixWave
- Backend Development — Hit Myanmar
- Full-Stack Web Dev — CodeLab

Languages

Myanmar — Native
English — Upper-Intermediate
Thai — Basic

Profile

Full Stack Developer building end-to-end web applications with React.js/Next.js on the frontend and Node.js (NestJS) on the backend. Flagship work: a large-scale enterprise ERP/POS system (NestJS/MySQL/Kafka backend with a Next.js admin frontend), a Kubernetes-deployed real-time food delivery platform, and a high-concurrency event ticketing platform using Redis atomic locking to guarantee zero double-booking — all designed with modular, service-oriented architecture. Comfortable across the stack — REST API design, relational and NoSQL databases, Docker, and CI/CD. Self-taught since 2024, quick to learn new stacks and tools.

Professional Experience

Freelance Full Stack Developer

2024 – Present

Self-Employed

React · Next.js · NestJS · TypeScript · PostgreSQL · MySQL · Docker · Kubernetes

- Independently designed, built, and shipped multiple production-grade web applications end to end for personal and client projects, owning both frontend and backend.
- Deployed backend services on self-hosted Kubernetes clusters and VPS infrastructure, including HPA-based autoscaling and PostgreSQL/Redis StatefulSets.

Mobile Developer

2026

BCN — Business Centric Network

Flutter · Dart · SQLite · ERPNext/Frappe · Socket.io · GitHub Actions CI/CD

- Built a production Android POS app integrated with ERPNext, with an automated CI/CD test pipeline.

Selected Projects

Backend Developer — Fashion ERP

Enterprise Retail Backend & AI Assistant, with a Next.js admin frontend

NestJS · TypeScript · MySQL · TypeORM · Redis · Kafka · Next.js · Jest

- Built a large-scale enterprise web application: ERP/POS system covering accounting, inventory, purchase, sales, and HR, with a NestJS/MySQL backend and a Next.js admin frontend.
- Used Kafka with a transactional outbox pattern for reliable event delivery; 111 automated tests (Jest), documented with a generated OpenAPI contract.
- Designed a hybrid RAG-based AI assistant (vector + full-text search) with permission-gated function-calling tools for live business data queries.

Backend Engineer (Lead) — WerTe

Food Delivery Platform

NestJS · TypeScript · PostgreSQL · Prisma · Redis · BullMQ · WebSocket · Docker · Kubernetes

- Architected a modular monolith with 25 domain modules and 49 PostgreSQL models; 9-stage real-time order tracking with multi-party chat (customer, merchant, rider) over a WebSocket gateway.
- Deployed on a self-hosted Kubernetes cluster: PostgreSQL/Redis StatefulSets, PgBouncer connection pooling, HPA autoscaling (2–6 pods), nginx Ingress with WebSocket support.
- Used BullMQ/Redis for background job processing decoupled from the request path.

Full Stack Engineer — Aura

High-Concurrency Event Ticketing & Seat Reservation Platform

NestJS · Angular 19 · Redis (Atomic Locks) · BullMQ · PostgreSQL · PgBouncer · WebSocket · Kubernetes · Docker

- Built a distributed ticketing/seat reservation system engineered to prevent double-booking under high concurrency, using Redis atomic locking (SET NX PX) to eliminate race conditions on seat holds.
- Used BullMQ background queues for time-boxed seat reservations with automatic release, and PgBouncer for horizontal database connection pooling.
- Built real-time seat-map sync over WebSocket and an interactive Angular 19 seat-selection UI.

Backend Developer — NeeYrAPI

Business Directory & Ad Platform

Django · DRF · PostgreSQL · JWT · RBAC

- 12-module architecture with custom RBAC and 105 automated tests (pytest-django).

Also: Eco Market, Home Sale & Receipt Mgmt System, Fashion E-Commerce Platform
